

Emergency Department Triage Record

Synthetic case: Non-cardiac presentation, no cardiac workup ordered

Patient

Record ID: SYNTH-0004

Age: 34

Sex: Female

Chief Complaint

Abdominal pain and nausea since this morning. Denies chest pain, denies shortness of breath.

Triage Vitals

Heart rate: 84 bpm

Blood pressure: 118/74 mmHg

Respiratory rate: 16 /min

O2 saturation: 99 %

Temperature: 99.1 F

Pain score: 4

Acuity (ESI): 3

Medical History

No significant past medical history.

Prior ED visits: 0

Note

No ECG performed. No cardiac biomarkers ordered.

This absence is itself informative: the model encodes an unordered test as the clinical decision not to order it, rather than imputing a population average.

SYNTHETIC RECORD - fictional patient, generated for testing the R26-IT-083 research prototype. Not a real clinical document.
